

Il Castoro

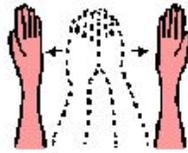

Il castoro

è

lungo

come

un banco

E

e

pesa

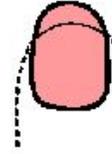

come

un bambino di 1 Elementare;

il castoro ha le unghie molto lunghe.

Il castoro

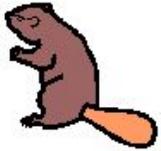

ha

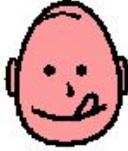

denti

fortissimi;

al castoro piace mangiare corteccia,

erba,

semi,

e radici;

il castoro

nuota

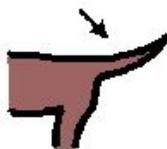

benissimo.

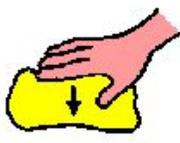

Il castoro

ha

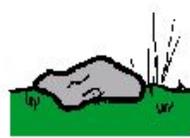

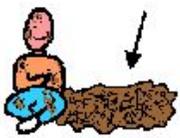

la coda

piatta

e forte

che va benissimo come una paletta per il fango mescolato ai sassi,

all'erba,

ai rami

degli alberi .

Il castoro

costruisce

delle lunghe

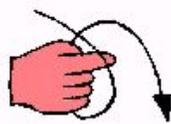

dighe

per fermare

il fiume;

dopo

scava

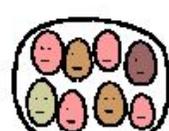

delle gallerie

nascoste

e ci abita

con tutta

la famiglia .
