

La Giraffa

 La giraffa  viene  dall'Africa, da un luogo  che si chiama 

 savana,  con molte  erbe secche  e pochi  alberi.

 La giraffa  è  alta  come  una casetta,  ha il collo  lunghissimo;

 la giraffa  pesa  come  tutti insieme  i bambini  della tua classe!

 La giraffa appena nata  è grande  come  una porta  e beve  il latte;

 dopo  mangia  l'erba,  ma le piacciono tanto

 i fiori  e le foglie  degli alberi.

La giraffa

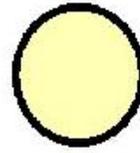

ha

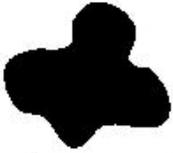

il pelo corto

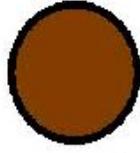

di colore

giallino,

molte macchie

marroni,

una corta

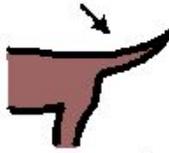

criniera

sul collo,

2 cornetti pelosi,

e una coda col ciuffo.

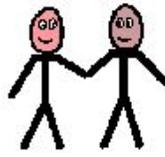

La giraffa

è

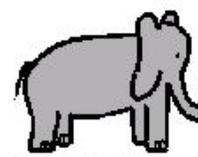

buona,

è amica

della zebra,

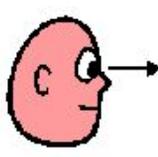

dell'elefante,

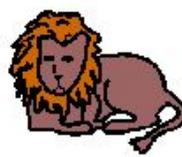

dello struzzo,

dell'antilope,

e vede bene da lontano

il leone

e il leopardo

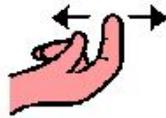

feroce.

Quando

il leone

viene

vicino,

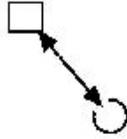

la giraffa corre veloce

come

un motorino

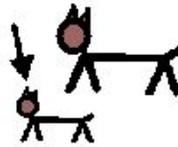

oppure

tira dei calci

fortissimi,

soprattutto per proteggere i suoi cuccioli.
